DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the both the length of the elongated cross section and length of the coil must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Figure 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: A coil assembly having a flat cooling pipe in a U-shape connected to a manifold having a coil wound around the cooling pipe and the manifold is neither found nor fairly suggested in the prior art. The closest art is Yoshikazu, JP 1194847 which shows cooling of core 6 part with refrigerant 13 to cool coil 7, as shown in figure 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inage shows a similar linear motor structure without cooling in figure 8. Assa shows a cooling duct extending through a base mounted coil.
